Guidelines: The aim of this template is to identify core foresight and innovation/entrepreneurship competences in relation to knowledge, skills and social competences that a future-oriented manager should possess. The source of data for the analysis are key books in the field and the other printed works on foresight and entrepreneurship (even popular-scientific studies) in national languages. Each partner involved in the task (universities) is free to select at least ten articles/books on the subject matter. The partners are also free to add any relevant articles/books. In the first place, we suggest to work on the publications which deal with the convergence among futures studies, entrepreneurship and innovation. In case of difficulty with the identification of core foresight and innovation/entrepreneurship competences in these sources, we suggest to work on the articles/books from three fields of expertise (namely foresight, entrepreneurship and innovation) separately.

Main highlights of the article (in bullets, up to 2500 characters including spaces)	The chapter starts with an overview of the changes within the curriculum of the Masters of Futures Studies at the FU Berlin. It refers to a survey which is published in the same publication [Crespi & Raderschall: 46f]. The main objective of the authors is to link the the methods, tools and competencies taught at the master program and the ones expected in the professional field of Futures Studies. By comparing these the aim is to find the challenges ahead and potential for development of the field
Other observations or comments	The survey was only conducted in German speaking countries (Germany, Austria, Switzerland) with 35 participants from different Institutions within Futures Studies. Therefore it only gives a broad overview on the topic.
